Exercise: Test Management and Issue Tracker

Problems for exercises and homework for the "QA Fundamentals and Manual testing" course @ Software University.

1. Task Board v.01

1. You are provided with the Task Board application.

https://replit.com/@SoftUniQA/TaskBoardV01

In order to test it you will have to fork it in your own Repl.it profile.

2. You also are provided with the SRS Requirements for Task Board Application in a separate file.

3. Given the SRS your task is to create Test cases for each of the functionalities of the application in TestRail.

4. Your second task is to log the bugs found in Jira.

2. Task Board v.02

After you reported the bugs you found, a developer fixed the app and now you have to re-test it.

1. You are provided with the Task Board application.

https://replit.com/@SoftUniQA/TaskBoardJSV02

In order to test it you will have to fork it in your own Repl.it profile.
